MR- Mill Creek Stream Restoration and  
Outfall Retrofits  
Contract Number B552202

Dear Anne Arundel County Resident:

This is to advise you that Anne Arundel County is preparing to design the above-referenced environmental restoration project. The County has authorized BayLand Consultants and Designers, Inc. to improve and restore Mill Creek (Lower section) stream, and associated outfalls near your property, and in the next few weeks, BayLand, Consultants and Designers, Inc. will begin the necessary surveys and site investigations.

The work to be performed will consist of upgrading the existing outfalls to meet the Chesapeake Bay and local restoration goals and ensuring they meet current codes and standards. This will serve to improve the overall functionality of the facilities, lower the County's maintenance costs, and improve the water quality treatment component of the facilities and the stream, which ultimately discharge to the Magothy River.

We are asking for your cooperation with Anne Arundel County and BayLand Consultants and Designers, Inc. personnel, who will work near your property as needed to access the stream and facilities. All field crews will have proper identification and be properly supervised. Personnel are anticipated to be in the area beginning on or around July 11, 2016.

If you should have questions or concerns, you may phone the Project Manager, Nasrin Dahlgren, at 410-222-4824. You may also write to the Project Manager at the Watershed Protection and

Telephone (410) 222-4240 Mailstop 7301 fax (410) 222-7589

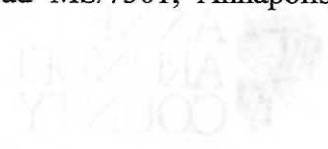

Restoration Program, Department of Public Works, 2662 Riva Road MS/7301, Annapolis, Maryland 21401.

Thank you for your consideration of this request.

Sincerely,

Erik Michelsen, Administrator  
Watershed Protection and Restoration Program  
Department of Public Works
